

Company Profile

South Africa's leading Heat Pump & Solar Water heating supplier

ITS is a professional manufacturer and international supplier of solar hot water systems and heat pump technologies with more than 25 years of experience in the various technologies.

Founded in 2006 by Managing Director – Mr. Riaan Honeyborne – ITS is South Africa's leading heat pump and solar water heating supplier.

ITS have their offices in Strand, Western Cape and Pretoria, Gauteng. They also have smaller depot's and a highly skilled network of franchises and agents throughout South Africa and neighboring countries, giving them the largest water heating support and service network in South Africa.

ITS currently supplies over 350 companies including retailers, distributors, solar installers, plumbers, franchise groups and pool maintenance companies. ITS pride themselves on their unrivalled knowledge and technical expertise in the water heating Industry and are pioneers in the renewable energy industry.

With thousands of systems currently installed throughout the country, ITS have been involved in the design and supply of a large number of projects including domestic, commercial, industrial, and agricultural applications. With each of these projects, ITS provides their clients with a service contract option aiming to build long term business relationships.

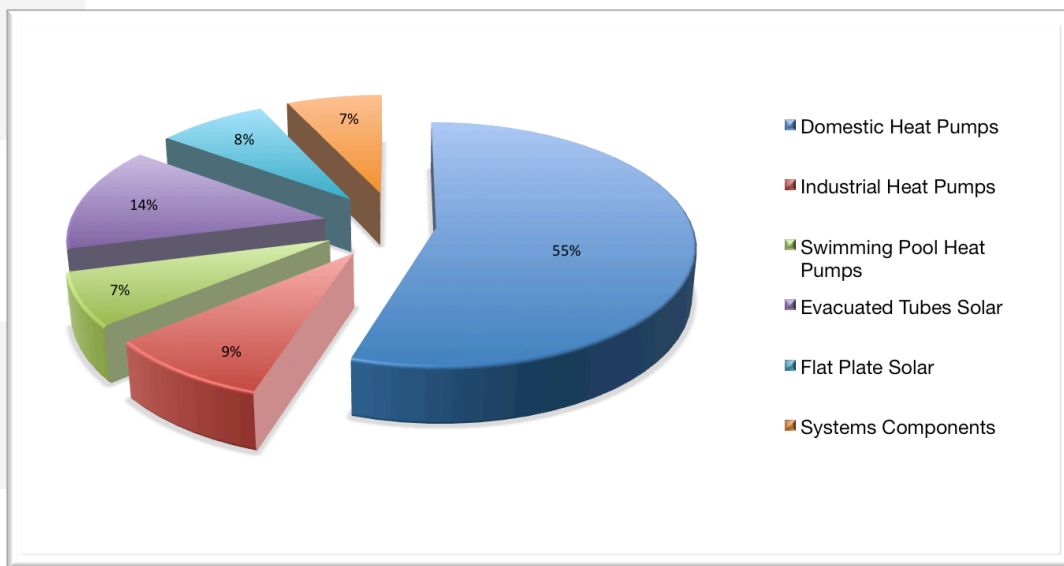

The ITS business model focusses strongly on technological progress and has a flexible and scalable production system putting ITS in a position to quickly respond to customer demands and to promptly implement product innovations. This allows the company to easily keep up with the pace of the dynamic market trends in the renewable energy water heating industry.

*With their strong engineering team, ITS have positioned themselves in the industry as market leaders supplying some of the largest renewable energy groups and corporate companies in South Africa. ITS is **Eskom's main supplier** on the heat pump rebate program and to date they have the most installations on this program*

Their advanced water heating systems include the following

- Evacuated tubes solar systems
- Flat plate solar systems
- Domestic, pool and Industrial heat pumps
- A variety of system components

Core focus of international technology sourcing

ITS Heat Pumps and Solar can design water heating systems for anyone in any industry and they are committed to helping their clients achieve maximum savings, with the overall result of reducing carbon emissions being omitted into the atmosphere.
